## DETAILED ACTION

### *Response to Arguments*

1. Applicant's amendments have overcome the 112 rejections.
2. Applicant's arguments filed 2/11/03 have been fully considered but they are not persuasive.

Applicants argue that Mechoulam does not disclose the specific compounds that are defined by the present claims. This is obviously true because if Mechoulam did disclosed said compounds, the claims would have been anticipated. The rejection made by the examiner is one of obviousness. Therefore, the reference needs to only suggest the instant claimed compounds. The genus disclosed in Mechoulam embraces the entire instant claimed genus. Furthermore, the compounds disclosed in Mechoulam are not that far removed from the instant claimed compounds. Both facts are sufficient to establish a prima facie case of obviousness. The compounds within this genus would reasonably be expected to have the utility of the genus as a whole.

Applicants argue superior properties of the instant claimed compound. However, applicants do not provide a side-by-side comparison as invited by the examiner to clearly show that the claimed genus does in fact have superior properties. Applicants choose to argue that Mechoulam did not recognize the compounds had any activity. This point is not well taken since the instant claims are "compound" and "composition" claims. The intended use of a compound

claim is afforded very little weight. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). If applicants were the first to recognize that known or obvious compounds have a new property, then it is more appropriate to present this finding in the form of method claims.

The preamble "CB2 specific agonist" in claim 40 has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Applicants do refer to the results of HU-259<sup>1</sup>. However, this is not the closest prior art compound. Thus no showing exists on the record clearly

---

<sup>1</sup> Please note that the examiner has interpreted applicant's response as referring to compound HU-259. Applicants appear to inadvertently refer to the results in Mechoulam as HU-255. However, applicants correctly stated that Mechoulam did not test HU-255.

demonstrating the instant claimed invention has superior properties over the prior art of Mechoulam. The rejection is maintained.

***Claim Rejections - 35 USC § 103***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 30-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mechoulam et al (US 5,434,295). For reasons see previous office action.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
